Gold-Standard Covid Rapid Test

The mobile test for SARS-CoV-2 from **UH-BioSystems** is based on proven LAMP technology (Loop mediated isothermal amplification) that detects **Covid infections** in rapid time.

The technology, which is certified by various health authorities and agencies, is **Gold-Standard** and provides **PCR** type results, yet involves a test methodology that is **very simple and fast** to conduct.
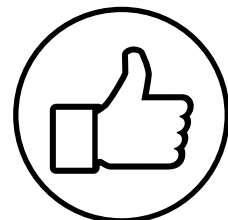

Up to 48 samples can be analyzed using the real-time fluorescence amplifier, which is operated via a user-friendly Android interface.
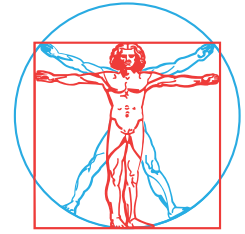

Once the simple procedure has been completed, the results are produced within **45-60** minutes.

Ideal for companies that need to conduct regular Covid testing

1000s of successful tests: including Vienna Medical University, Film & TV Studios, Hospitals, Laboratories, Refugee Centres, Corporations & Factories, etc.

Thus, a SARS-CoV-2 infection can be detected at an early stage, the affected person isolated and the formation of clusters prevented!

FACTS

- Gold-standard PCR type results due to advanced LAMP technology
- Medical certificates for travel abroad can be issued
- Negative and positive results shown directly on the tablet within 45-60 minutes
- Mobile Test Case/Station as a one-time investment
- Up to 48 people can be tested at the same time
- CE-IVD certified
- User-friendly and simple test procedure
- Test kits also available for Influenza, Legionella, Malaria and many others, including for sectors such as Clinical Diagnostics, Agriculture & Phytopathology, Food & Water Safety, Environment, and Veterinary
